Do you feel the urge to keep evolving and pushing forward?

Join us!

Where:	Groningen (NL)
Domain:	Technical process engineering
Experience:	3+ years
Degree:	Bachelor or Master

Working at Foamplant is a unique experience. You get the opportunity to work for a company with a meaningful and impact driven mission. A mission towards supplying **safe, reliable and sustainable foams for everyone.**

What will you do as Process Engineer?

You will become an integral part of our Production Team which fulfills the production requirements for the continuously growing market demand towards biodegradable foams. In parallel to this essential role our Production Team acts as an architect of yet to be developed Foamplant factories. You will act as our lead process engineer by identifying and solving crucial production bottlenecks. By taking the lead in optimizing our innovative and in-house developed production processes you will be able to push the production efficiency to the next level. Your skills as process engineer deliver continuity and quality by implementing standardized production methods. Your work will set a reliable foundation for developing our sustainable manufacturing industry.

Your day will never be the same, you will work with highly motivated and talented colleagues on challenging manufacturing topics.

Because of our young and fast growing organization you are able to influence your activities in such a way that you gain the highest level of efficiency. Your entrepreneurial mindset can thrive to make sure that you work on the right topics at the right time.

Your job will consist of but is not limited to:

- Generating clear data-driven overviews of production processes
- Identify & solve major production process bottlenecks
- Develop standardized production manuals & methodologies
- Train & coach colleagues towards realizing increased efficiency

What do we expect from an Process Engineer at Foamplant?

In order to succeed as a tech startup in the challenging manufacturing industry pro-activity, creativity, professionalism, communication and adaptability are crucial. We are looking for people with an ambitious attitude who learn from the past (tried and tested) and who strive to set new standards when needed. Furthermore we are looking for someone with:

- A Master or Bachelor degree in Process Engineering or equivalent
- 3+ years of full time relevant experience
- Ability & experience in defining bottlenecks in complex processes
- Experience with relevant standards & methodologies in manufacturing industry
- Skills for training & coaching colleagues towards optimized performance
- Ability to work in dynamical multidisciplinary teams
- A strong desire to optimize & automate
- Experience with LeanSS
- Availability for ≥32 hours per week

What can you expect from Foamplant?

In addition to a challenging role we also offer:

- A high degree of freedom and independence in your role
- The ability to be involved in the growth and success of Foamplant and co-define your own role as the company develops
- A role within a multidisciplinary team consisting of highly motivated, inquisitive and talented people with a broad diversity of experience
- 27 vacation days per year (on top of national holidays)
- A balanced pension through Nationale Nederlanden
